

4<sup>TH</sup> ANNUAL AMERICAN  
**DENTAL IMPLANT**  
ASSOCIATION

*Symposium*

**LAS VEGAS**  
MANDALAY BAY HOTEL  
JANUARY 21-22, 2011

American  
Dental Implant  
Association

**305.944.9636**

Dear Friends and Colleagues,

The American Dental Implant Association provides interesting and dynamic educational experiences for dental colleagues in an environment that encourages and supports personal friendships and fellowship. This meeting will allow you the opportunity to learn from experts and visionaries in the fields of surgery, periodontics, dental technology, and marketing.

Upon completion of this symposium, participants will be able to understand the cutting-edge surgical techniques, prosthetic techniques, graft materials and new products available in the field of implant dentistry!

We extend a warm welcome to all participants, their families and team members, and thank you for your support. This program will provide you and your team the opportunity to network, exchange information, find solutions, and socialize with colleagues, friends, and their families from around the country and around the world.

Our Team will be there to assist you further in your implant education and for you to experience Las Vegas' superb entertainment, nightclubs, dining, shopping and sightseeing. Prepare for a fascinating, challenging, educational, and thoroughly enjoyable experience! We look forward to welcoming each and every one of you!

Sincerely,

Arun K. Garg, DMD

# MANDALAY BAY LAS VEGAS

From the uninhibited to the unconventional, Mandalay Bay offers some of the most unique experiences on the planet.

## Mandalay Bay

3950 Las Vegas Blvd South,  
Las Vegas, NV 89119

## Implant Complications Management - Dr Leon Chen

Time: 8:30am - 5:00pm..... Tuition - \$1,895.00

### Course Highlights

13 common complications and how to prevent or repair them.

- What to do if the implant is crooked.
- What to do if the implant is loose.
- What to do if the implant has exposed threads.
- What to do if the implant is too close to another implant.
- What to do if the implant is too close to a nerve.
- What to do if the implant has perforated the lingual plate.
- What to do if the implant has dropped into the sinus cavity.
- What to do if the implant has dropped into the nasal cavity.
- What to do if the oral sinus is opened
- What to do if sinus membrane is perforated.
- What to do if the sinus becomes infected.
- What to do if another doctor has announced the case is hopeless.
- What to do if the implant is fully integrated, but the patient is still in pain.

### Course Objectives

After completing this course the clinician should be able to treat and manage various types of surgical, prosthetic, and peri-implantitis implant failures. The clinician should be able to recognize potential pitfalls of a particular case at the treatment planning stage to avoid potential complications. When complications arise, he or she will be able to determine the best solution to solve that problem either by repair, and/or by implant removal and re-implantation. This course also gives the clinician the ability to manage soft tissue around the implant to correct implant esthetic failures.

## Autografting with the hcPRP Methodology

A Hands-on Seminar - Dr. Astley Smith

Time: 9:00am - 1:00pm..... Tuition - \$295.00

This ½ day seminar will train Doctors to master techniques and to develop competence in the production and activation of PRP23x for rapid regeneration of soft and hard tissue to facilitate implant placement and soft tissue esthetics. The hcPRP centrifuges and new custom designed blood collection kits will be used in the seminar.

## Hands-On Implant Placement And Bone Management

With Cadaver Specimen Workshop - Dr. Arun K. Garg

Time: 8:00am - 6:00pm..... Tuition - \$3,800.00

### Course Highlights

In this accelerated surgical lecture and workshop program, participants will gain the confidence and knowledge to perfect:

- Bone Grafting including Ridge Preservation
- Bone Harvesting
- Maxillary Sinus Grafting
- Soft Tissue Management
- Use of Ostetomes
- Block Grafting

Plus, learn more about:

- Hard and Soft Tissue Management
- Using and Reading CT - Scans
- Use of Piezo Technology for Surgery
- Use of Growth Factors

## Extraction Immediate Implant Placement: Single Tooth to Full Mouth - Dr. Charles Babbush

Time: 1:00pm - 5:00pm..... Tuition - \$275.00

The concept of extraction immediate implant replacement has become one of the hottest topics in implant dentistry. This workshop will feature this concept ranging from single tooth to full mouth reconstruction. The latest implant design, NobelActive, will be used to demonstrate these techniques as used in more than 2000 implants. Guidelines, developed over the past 20 years for immediate implant replacement will be presented. A large series of cases will be used to demonstrate this concept in a step-by-step fashion, from diagrams, to surgery, to prosthetic reconstruction and follow up. A series of statistics will also be presented to document the efficacy of extraction, immediate implant placement; which will include the All-On-4 procedure.

# FEATURED

Dr. Babbush is one of the leading dental implant surgeons in the world. He placed his first dental implant in 1968. His distinguished career includes teaching positions at 3 premier universities across the world and 28 societal and academic offices and appointments. He has authored three textbooks: Surgical Atlas of Dental Implant Techniques, Dental Implants: Principles and Practice and his newest, Dental Implants: The Art and Science.

Charles Babbush, DDS, MScD

Dr. Nate Booth has been studying, applying and assisting associations, corporations and individuals in the art of thriving in times of rapid change for over twenty-five years. His high-energy and entertaining programs are packed with information that will improve your business, change your life, and bring your group alive with action!

Nate Booth, DDS

Dr. Don Callan has a private practice limited to periodontics with an emphasis on tissue regeneration and implant dentistry. He is Assistant Clinical Professor, Department of Periodontics at Louisiana State University.

Donald Callan, DDS

Renzo Casellini is a Master Dental Technologist, trained in Switzerland where his family has been in the dental industry for four generations. For the past 37 years he has been the owner of Swiss Quality Dental Ceramics & Dental Implant Studio. He services accounts throughout the United States and Internationally. His detailed articles on implants and esthetics have been featured in over 50 professional publications throughout the world.

Renzo Casellini, MDT

Dr. Jennifer Cha utilizes her expertise in dental implants, both surgical and restorative, and specifically in full mouth reconstruction of complicated dental implant cases, to offer the most advanced care to her patients through a revolutionary procedure combining 5 procedures into one surgical visit that is less invasive, less painful, with a faster healing time and the highest rate of success.

Jennifer Cha, DMD, MS

# SPEAKERS

Dr. Chen is world renowned for his development of the techniques of Hydraulic Sinus Condensing. He is a practicing Periodontist and Implantologist in Las Vegas and Los Angeles.

Leon Chen, DMD, MS

Len Conner is the Tech Services & Group Product Manager for the Americas at Zimmer dental. He has been a technical expert for 24 years in Implant Dentistry.

Len Conner

Dr. Howard Farran is a noted international lecturer on faster, easier, more efficient dentistry. He has captivated audiences around the world with his innovative, informational and entertaining style. In his seminar entitled, "The Virtues of Profitable Dentistry" he gets down to the nitty gritty details of running a thriving family practice. He can show any dental team how they too can achieve their dreams and goals.

Howard Farran, DDS, MBA, MAGD

Dr. Scott D. Ganz, D.M.D graduated from the University of Medicine and Dentistry - New Jersey Dental School. He completed a three-year specialty program in Maxillofacial Prosthetics at M.D. Anderson Cancer Center in Houston, TX. During this time Dr. Ganz was exposed to many different aspects of head and neck reconstruction, fabricating both intra-oral and extra-oral prostheses such as eyes, ears, noses, and etc.

Scott D. Ganz, DMD

Dr. Goodchild has published numerous articles and spoken to many State Dental Boards on the topic of enteral sedation dentistry. He has been as invited speaker for the Academy of General Dentistry and American Association for Dental Examiners. He is a reviewer for the Journal of the American Dental Association and Quintessence International. He has also served as a grant reviewer for the National Institute of Health

Jason Goodchild, DDS

Dr. Hahn developed implant devices and techniques (For example The Replace implant from Nobelbiocare), and is involved in various clinical studies.

Jack Hahn, DDS

# FEATURED

Dr. Jack Krauser has written numerous chapters in periodontal and/or implant related texts and authored or co-authored more than 120 articles in various publications. He is also on the editorial board of several journals and newsletters.

Jack T. Krauser, DMD

Dr. Kurtzman is in general practice in Silver Spring, MD. He has lectured both nationally and internationally on the topics of Restorative dentistry, Endodontics and Implant Surgery and Prosthetics, Removable and Fixed Prosthetics, Periodontics and has over 170 published articles.

Gregori M. Kurtzman, DDS

Dr. Kuy Ky received his dental education from the University of the Southern California in 1996 and returned home to Stockton after graduation. He lectures nationally to his peers on dental implants, and co-directed Implant Dentistry Continuum for the San Francisco and Los Angeles Programs from 2003-2007.

Kuy Ky, DDS

Dr. Robert E. Marx, Professor of Surgery and Chief of the Division of Oral and Maxillofacial Surgery at the University of Miami Miller School of Medicine, is widely known as an educator, researcher and innovative surgeon. He has pioneered new concepts and treatments for pathologies of the oral and maxillofacial area; as well as new techniques in reconstructive surgery.

Robert E. Marx, DDS

Dr. Naruse has been performing implant surgery since 1985 and has been running his own periodontal clinic for 22 years. He is an authority on Vertical Bone Augmentation, and regularly gives lectures worldwide on GBR and Sinus Lifting.

Keiichi Naruse, DDS

# SPEAKERS

Dr. Nordquist has practiced dentistry in San Diego California since 1973. This research includes, Implant Brace, the orthopedic application of the CEI, fluorapatite a grafting material used to prevent and/or treat infection around dental implants, and The Actual Tooth Replacement (ATR) implant which is an alternative to root canal therapy and immediate placement and function dental implant.

William D. Nordquist, BS, DMD, MS

Dr. Astley E. Smith attended the University of Manitoba where he earned a Bachelor of Science Degree (B.Sc.) in Chemistry, a Masters of Science Degree (M.Sc.) in Biochemistry and a Doctor of Dental Medicine Degree (D.M.D.).

Astley E. Smith, BSc, MSc, DMD

Dr. Sebastian Tseng is President of GwoWei Technology Co., Ltd, and is President of GwoRei Biomedical Technology Co. He is also President of Academy of Oral Implantology Republic of China. In addition he is Supervisor of Taipei Dental Association and Vice President and Managing Director of Dental Alumni Association of Chung Shan Medical University.

Sebastian Tseng, DDS, DADIA

Dr. Tolstunov graduated in 1985 from the prestigious Moscow Dental University and spent 3 years specializing in Oral and Maxillofacial Surgery in the Trauma Hospital in Moscow. In 1989 he moved to San Francisco where he studied at the University of the Pacific, School of Dentistry, and then Oral and Maxillofacial Surgery Residency Training program at the University of California San Francisco. He has been practicing the specialty of oral surgery and oral implantology in his private practice.

Len Tolstunov, DDS

Dr. Emil Verban has been placing implants for over 15 years and has developed and patented surgical products which greatly increase safety and precision for implant surgery.

Emil Verban, DDS

## Hydraulic Sinus Condensing Technique®

Dr. Leon Chen

Time: 8:30am - 5:00pm..... Tuition - \$1,895.00

### Course Highlights

HYDRAULIC SINUS CONDENSING TECHNIQUE® (HSC) is today's premier technique for sinus augmentation. Less invasive than prior sinus augmentation techniques, HSC utilizes water pressure to prevent membrane perforation, with condensers to gently build up the sinus floor. This course will show you how to perform HSC in any situation, including cases with severely atrophic maxilla, septum presence and severely sloping sinus floors. You will also learn HSC with immediate implant placement and platform switching for initial stabilization. Never before has Sinus Condensing been so easy to perform and so easy on your patients. This course will open your eyes to the future of maxillary implant dentistry.

### Course Objectives

This course is intended for those who would like to be able to place dental implants under the maxillary sinus. Various methods of sinus augmentations are discussed. However, this course will focus primarily on the Hydraulic Sinus Condensing technique developed by the lecturer. This technique is taught step by step with the armamentarium required for the procedure. Possible membrane perforation management is discussed as well as other possible complications and how to manage the potential complications. The dentist will be able to tackle cases involving only 1mm of native bone under the maxillary sinus with ease and be able to place implants simultaneously. Immediate extraction and implant cases involving sinus augmentations are also discussed.

## THE "YES" SYSTEM - How to Make It Easy for People to Accept Comprehensive Dentistry - Dr. Nate Booth

Time: 8:30am - 5:00pm.....Tuition - \$199.00

You can be the most knowledgeable and caring professional in the world, with the best team and outstanding services, but your impact will be severely limited if you can't influence people to take action on your recommendations. In The "Yes" System, you will learn the seven stages patients go through to make important decisions. Now, your entire team can be there for people every step of the way making it easy for them to say "Yes" to comprehensive care.

In an enjoyable, interactive and effective format, your team will learn how to:

- Position your office to attract the patients you desire.
- Establish a reputation that predisposes people to accept your recommendations.
- Create an environment of trust and rapport.
- Use The Diamond Touch to understand your patients' unique set of fears and desires.
- Progressively build value so cost and insurance considerations are reduced.
- Elegantly ask ten questions that set the stage for case acceptance.
- Conduct an examination that compels people to ask for your recommendations.
- Become trusted advisors so resistance is eliminated.
- Weld Value Links between your treatment and the patient's most compelling desires.
- Make comprehensive care affordable.
- Create urgency so people want to take the next step now.
- How to use PowerPoint to create an impactful case presentation

### CREATING LONG-TERM RESULTS FOR YOUR GROUP

The program is not a one-time event where your group feels good for a day, and then it's back to "business as usual." They are programs where your group will enjoyably learn practical, easy-to-use and effective skills, and then want to take action to implement the skills in your business and their lives.

Here's how we will accomplish this:

Each person will receive a customized Learner Guide which they will complete during Dr. Booth's presentation and then take home for reference and reinforcement.

# JANUARY 21, 2011

- 7:45-8:00 Arun K. Garg, DMD "Welcome"
- 8:00-9:00 Keiichi Naruse, DDS "Vertical-Ridge Augmentation"
- 9:00-10:00 Donald Callan, DDS "Gingivitis, Periodontis, Peri-implants: Is there a connection?"
- 10:00 - 11:00 Gregori M. Kurtzman, DDS "Advances in CAD/CAM Prosthetics for Over-Dentures and Fixed Hybrids & Understanding Bipolar Electrosurgery and its Applications in Implant Dentistry"
- 11:00-11:30 Morning Break
- 11:30-12:30 Jennifer Cha, DMD, MS "Flow Chart for Analyzing and Managing Implant Surgical Complications"
- 12:30-1:30 Lunch
- 1:30-2:30 Jack Hahn, DDS "The Emergency Implant - Immediate Extraction Replacement"
- 2:30-3:30 Emil Verban, DDS "Model Based and CT guided implant surgery with the Aid of a Verban Drillstop"
- 3:30-4:00 Afternoon Break
- 4:00-4:30 William D. Nordquist, BS, DMD, MS "Understanding Bone Loss Associated with Periimplantoclasia Related with Failing and Ailing Dental Implants and its Treatment"
- 4:30-5:30 Astley E. Smith, BSc., MSc., DMD "The role of highly concentrated platelet rich plasma (hcPRP) in tissue regeneration to facilitate implant placement and soft tissue aesthetics."
- 5:30 - 6:15 Sebastian Tseng, DDS, DADIA "Update Protocol of Immediate Loading in Implant Dentistry"
- 6:30pm Cocktail Reception

ACCREDITATION: Implant Seminars is a designated and approved sponsor by the Academy of General Dentistry. As such, this sponsor's continuing dental education is accepted by the AGD for credit applicable toward membership, maintenance and Fellowship/Mastership Credit. The American Dental Implant Association is providing this program in co-sponsorship with Implant Seminars.  
THIS PROGRAM IS APPROVED FOR 16 CREDIT HOURS.

# JANUARY 22, 2011

- 8:00 - 9:00 Charles Babbush, DDS, MScD "State of the Art Implants 2011."
- 9:00 - 10:00 Robert Marx, DDS "Clinical Applications of BMP's in Dental Implant Bone Grafting Procedures "
- 10:00 - 11:00 Len Tolstunov, DDS "Functional Implant Zones of the Jaws. Dental Implant Success-Failure Analysis"
- 11:00 - 11:30 Kuy Ky, DDS "Zero Load Appliance - Great Appliance for Anterior Aesthetics to Preserve the Interdental Papillae"
- 11:30 - 12:30 Howard Farran, DDS, MBA, MAGD "Virtues of Profitable Implant Dentistry"
- 12:30 -1:30 Lunch
- 1:30-2:30 Scott Ganz, DMD and Jack T. Krauser, DMD "Establishing New Paradigms for Dental Implant Reconstruction with 3-D imaging Technologies: Art or Science?"
- 2:30-3:30 Renzo Casselini, MDT "The Future of Implant Esthetics"
- 3:30-4:00 Afternoon Break
- 4:00-5:00 Jason Goodchild, DDS "Pharmacology Considerations in Implant Surgery"
- 5:00 - 5:45 Len Conner " A Triage of Techniques for Removing Stripped or Brokem Screws from Dental Implants"
- 6:00pm Meeting Adjourns

Speakers are subject to change without notification.
